(54) Title: GOLF GLOVE

(57) Abstract: The present invention relates to golf gloves put on a user's hands, which grasp a grip of a golf club. More particularly, the present invention relates to golf gloves having improved fixability and compactability for a grip, in which the root portion between and index finger portion and a thumb portion and the upper portion thereof are generally connected with each other and thicker than other portions of the golf glove to allow a golfer to grasp the grip of a golf club fixably and stably, and the index finger portion and the thumb portion are thicker than other portion to minimize a gap therebetween, so that the golfer may grasp the grip of the golf club naturally and firmly without great grasping power.
